

System requirements

Installation of migRaven requires a dedicated server. The server must also be a member of the domain in which migRaven will be used. Port 80 is required for the web server. Other web applications should not be hosted on it.

Stand-alone installation: migRaven and the database run on the same server.

Multi server installation: In large environments with more than 50,000 users and many file servers, we recommend that you install the database and application on different servers.

migRaven Server components + Rich Client for Migration

Component	Minimum requirement
Operating System	64bit, from Windows Server 2012
RAM	8 GB* / 32 GB**
CPU	4 Cores (8 Recommended)
Resolution	1600x900
.NET framework	4.7.2
Windows Installer	Version 5 (Windows 7 and higher)

migRaven Database (Includes neo4j - a Java based graph database)

Component	Minimum requirement
Operating system	64bit, from Windows Server 2012
RAM	8 GB* / 32 GB**
Java Runtime Environment	Recommended: OpenJDK Zulu Version 11 (64 bit) - Newer versions not supported Alternatively: OracleJDK 11 (64 bit) - Newer versions not supported
CPU	4 Cores (8+ Cores Recommended*)
Hard drive	20 GB (min. 40 GB Recommended*)
.NET Framework	4.7.2

VN210119 - This document applies to migRaven starting from version 6.5.20485.1

* Recommended from 1000 users/1 TB file server data

** Recommended from 5000 users/5 TB file server data

migRaven Data Owner Client (Web-based)

Component	Version
IIS (Internet Information Services)	from Version 8
Operating system	Server 2012 R2, 64 bit

Supported Browsers	Version
Mozilla Firefox	from Version 57.0
Google Chrome	from Version 56.0
Microsoft Edge (Chromium)	from Version 79.0.309

Supported Systems

migRaven can scan the following systems.

Directory Services	OS versions
MS Active Directory	2008 R2, 2012, 2012 R2, 2016, 2019

File server	OS versions
Windows Server	2003 R2, 2008 R2, 2012, 2012 R2, 2016, 2019
Microsoft DFS	2003 R2, 2008 R2, 2012, 2012 R2, 2016, 2019
NetApp	ab ONTAP 7.5
EMC	VNX
Novell (Trustee.xml Import)	LDAP V.3 Port 389 (without SSL)
